AMENDMENT AND RESPONSE UNDER 37 C.F.R. § 1.111

Sir:

REMARKS

An Office Action, Paper No. 10, issued in this application on April 24, 2002. Claims 4-6, 8, 10-12, 14, 16, 18-22, 24 and 26-28 are pending and stand rejected. Reconsideration is respectfully requested in light of the following remarks.

Rejections under Obviousness-Type Double Patenting

Claims 4-6, 8, 10-12, 14, 16, 18-22, 24 and 26-28 are rejected under the judicially created doctrine of double patenting as being unpatentable over claims 28-40 of U.S. Patent No. 5,972,712, respectively. The Examiner states that although the conflicting claims are not identical, they are not patentably distinct from each other because both teach method of evaluating the clotting characteristics of blood. A Terminal Disclaimer with respect to U.S. Patent No. 5,972,712 will be filed when patentable subject matter has been determined.

Rejection under 35 U.S.C. § 103(a)

Claims 4-6, 8, 10-12, 14, 16, 18-22, 24 and 26-28 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Baugh (5,314,826) in view of Hanahan et al. (4,329,302). The Examiner states that Baugh teaches a method for the evaluation of clotting characteristics of platelets. The Examiner also alleges that while the Baugh is silent to the claimed 1-O-alkyl-2-acetyl-sn-glyceryl-3-phosphorylcholine (AGEPC), it would have been within the skill
